

**ABSTRACT**

5 An electronic device, having an exterior surface, the electronic device  
comprising:  
an actuator for providing, when enabled, a first texture at a first portion of the  
exterior surface of the electronic device and for providing, when disabled, a  
second texture at the first portion of exterior surface of the electronic device;  
10 a user interface for changing the status of the electronic device from a first  
status to a second status; and  
a processor operable to enable the actuator during the first status and disable  
the actuator during the second status.
